Titles

A

Acid Fermentation in Water-organic Solvent Two-liquid Phase Systems 109
Affinity Chromatography for Cell Separation: Mathematical Model and Experimental Analysis .. 189
Alginate-polylysine Microcapsules of Controlled Membrane Molecular Weight Cutoff for Mammalian Cell Culture Engineering 231
Analysis of Intra-versus Extracapillary Growth in a Hollow Fiber Reactor, An 80
Analysis of Urea Hydrolysis by Immobilized Ureas in Urea-Sensing Electrodes 90
Are Microbes Optimal Strategists? 121

B

Biologically Active Surfaces: Processes Governing the Formation and Persistence of Biofilms ... 57

C

Comparative Study of Models to Predict Protein Adsorption, A ... 141

E

Effective Diffusion Coefficients in Calcium Alginate Gel 115
Effect of Detergent Level and Dispersion Rheology on the Olefin Yield From Fractionation of Tallow, The 146
Electrophoretic Elution from Monoclonal Antibody Immunoadsorbents: A Theoretical and Experimental Investigation of Controlling Parameters 177
Elimination of Diffusional Limitations in a Membrane Entrapped Cell Reactor by Pressure Cycling 259
Extractive Fermentation of Acetone and Butanol: Design and Economic Evaluation 131

I

Improvements in Multi-turbine Mass Transfer Models 168
Intercompartmental Fluid Shifts in Hemodialysis Patients 69

L

Large Scale Purification of Heparinase 27

M

Mathematical Modelling and Response Characteristics of Runaway Replication for Temperature Shift-up 101
Metabolic Pathway Rates and Culture Fluorescence in Batch Fermentation of Clostridium Acetobutylicum 153
Metal Ion: Hydrophobic, Thiophillic and II-Electron Governed Interactions and Their Application of Salt-promoted Protein Adsorption Chromatography 14
Microbial Catabolites as Chemical Synthesis Intermediates: A Cost Benefit Analysis 127

O

Optimization of Process Chromatography of Proteins, On the 9
Orthogonal Collocation Approximation for Parameter Identification and Control Optimization of a Distributed Parameter Biological Reactor, Use of 248

P

Plant Cell Bioreactors: Present Status and Future Trends 1
Polymer Dosage Considerations in Polyelectrolyte Precipitation of Protein 241
Purification of Monoclonal Antibodies from Large-scale Mammalian Cell Culture Perfusion Systems . 49
Purification of Proteins and the Disruption of Microbial Cells 31

S

Secretion of Heterologous Proteins from Saccharomyces Cerevisiae . 43
Simulation of the Effect of Formula and Feed Rate Variations on the Transient Behavior of Starved Extrusion Screws, A 221
Simulation of the Effects of Formula and Feed Rate Variations on the Transient Output of Single Screw Food Extruders, A 212

T

Techniques for Estimating the Vapor-liquid Equilibrium of Sugar Solutions 205
Theoretical Examination of Adsorption Processes in Preparative Liquid Chromatography of Proteins, A 22

Statement of Ownership, Management, and Circulation (required by 39 U.S.C. 3685) of September 21, 1987, for *Biotechnology Progress* Publication No. 8756-7938, issued quarterly for an annual subscription price of $50 from 345 E. 47th St., New York, NY 10017, which is the location of its publication and business offices. The name and address of the Publisher, Editor, and Managing Editor are: Publisher, Diane Foster, 345 E. 47th St., New York, NY 10017; Editor, Michael L. Shuler, 345 E. 47th St., New York, NY 10017; Managing Editor, Maura Mullen, 345 E. 47th St., New York, NY 10017. The owner is: American Institute of Chemical Engineers, 345 E. 47th St., New York, NY 10017. The known bondholders, mortgagees, and other security holders owning or holding one percent or more of the total amount of bonds, mortgages, or other securities are: None. The purpose, function, and nonprofit status of this organization, and the exempt status for federal income tax purposes have not changed during the preceding 12 months. The following figures describe the nature and extent of *Biotechnology Progress*' circulation. In each category the first number (in *italics*) is the *average number of copies of each issue during the preceding 12 months*. The number next to it, within parentheses (), is the actual number of copies of the single issue published nearest to the filing date. Total number of copies printed (net press run), *4,325* (4,000). Paid circulation: 1. Sales through dealers and carriers, street vendors, and counter sales: None; 2. Mail subscriptions, *2,995* (2,993). Total paid circulation *2,995* (2,993). Free distribution by mail carrier, or other means; samples, complimentary, and other free copies, *24* (25). Total distribution *3,019* (3,018). Copies not distributed: 1. Office use, left over, unaccounted, spoiled after printing *1,306* (982). 2. Returns from news agents: None. Total *4,325* (4,000). I certify that the statements made by me are correct and complete. Diane Foster, Publisher.

Subjects

A

Acetone 131
Acid 109
Adsorption 14, 22, 141
Affinity 189
Alginate 115, 231
Analysis 74, 80, 90, 127, 189
Antibodies, monoclonal 49
Application 14
Approximation 248

B

Batch 153
Behavior 221
Biofilms 57
Biologically active 57
Biological reactor 248
Bioreactors 1, 80
Butanol 131

C

Calcium 115
Catabolites 127
Cell 1, 31, 49, 189, 231, 259
Characteristics 101
Chemical synthesis 127
Chromatography 9, 14, 22, 189
Clostridium Acetobutylicum 153
Coefficients 115
Collocation 248
Comparative 141
Considerations 241
